

Custom Billing Solutions

At BCN, we understand that every business has unique billing needs. That's why we offer a variety of custom billing solutions designed to address these specific requirements. Our customer-centric approach and unwavering commitment to the customer experience ensure that we deliver tailored technology solutions that meet and exceed our customers' expectations.

Standard Billing

- One Invoice / One Account

Location Level Billing

One Invoice / One Account including all locations or departments

- Location Level Billing allows multiple products to be broken out on the invoice by a specific location or department.
- Location Level Billing allows customers to choose how locations are categorized, i.e., by Service Address, Cost Center, Regional Division, etc.
- With Location Level Billing, taxes and fees are not able to be specified by location or department.

Corporate Level Billing

One Corporate Account with multiple Sub Accounts for each location or department

- With Corporate Level Billing customers can opt to have one summary invoice including total for all Sub Accounts, individual invoices for each Sub Account, or both.
- Corporate Level Billing can also be used for customers who choose to have one Parent Account with multiple Child Accounts underneath. In this scenario, the Corporate Level invoice will show all the Child Account charges.
 - Payment can be made at the Corporate Level or Child Level.
 - Customers may choose to have Child account invoices sent directly to each location or department.
 - Taxes and fees are able to be specified by location or department.
