

Unbreakable Internet. Anywhere. Anytime.

www.bcntele.com

What Makes LEO Satellite Internet Unique?

LEO satellites orbit closer to Earth, reducing lag compared to traditional satellite services, offering unique benefits.

1

Availability:

It works in remote areas where other services are costly or unavailable.

2

Speedy Deployment:

It is quick to set up across diverse environments and structures.

3

Reliability in Crises:

It serves as a critical lifeline during natural disasters or severe disruptions.

Why Combine LEO Satellite with Bigleaf SD-WAN?

Bigleaf SD-WAN enhances LEO Satellite Internet as a primary or backup connection, delivering superior reliability and performance.

This translates to higher productivity, smoother operations, and better outcomes.

The results?

40%

Up to 40% less downtime compared to traditional satellite services.

20%

Improved performance for VoIP, video conferencing, and cloud services, with up to a 20% boost in application quality.

Experience
BCN

At BCN, we specialize in creating solutions that enhance your experience. By combining Bigleaf SD-WAN with LEO Satellite Internet, we ensure unbreakable internet connectivity wherever and whenever you need it.
