## Why LEO Satellite Internet with BCN?

### High-Speed, Low-Latency Performance:

- Achieve speeds up to 350Mbps download and 50Mbps upload, with low latency of 25 to 75 milliseconds—ideal for data-intensive applications.

### Nationwide Installation and Support:

- Benefit from professional field installation services across the U.S., ensuring seamless setup and comprehensive support for every location.

### 24/7/365 USA-Based Customer Support:

- Our dedicated, U.S.-based support team is available around the clock to keep your clients connected without interruption.

### Flexible Data Plans:

- Choose from four Priority Data plans to meet the specific needs and usage requirements of your clients.

### Fully Monitored Service:

- With proactive trouble ticketing from BCN's Network Operations Center, you can ensure reliable and consistent connectivity.

Unlock new opportunities for your customers with BCN's LEO Satellite Internet.
